

# LED FIXTURE

---

## SPECIFICATIONS

Feit Electric's OneSync PATH/SYNC/SOL/BZ/2 Starter Kit combines bright solar light, durable construction, and customizable control like never before. Each kit includes two 12-inch pathway lights and wireless remote control. Their 40-lumen output is 3x brighter than traditional solar lights. LED technology delivers up to 10,000 hours of life. Weather-resistant, each heavy-duty light kit is backed by a 3-year warranty. Select from five shades of white (2700K, 3000K, 4000K, 5000K, and 6500K) or 8 colors to set your desired mood. Its built-in dusk-to-dawn light activates once the sun goes down and stays lit for up to 8 hours. Place them where you like and ensure the solar panel gets plenty of sunlight. No wiring is required. For wireless control, hold the button on the light and press the group button on the remote. Create up to 6 lighting groups. Set timers to customize your landscape for parties, holidays, and more. OneSync comes in a stylish bronze finish adding a traditional look to your home. Easy installation means you never have to dig up your backyard or hire a professional. OneSync outdoor lights sync within 100 feet of each other for unlimited total range. For even more flexibility, pair with the OneSync Smart Wi-Fi Bridge (sold separately) to control lights from your phone or smart device. Experience the glow as far as you can go. The days of subpar solar are over.
