

# LED LAMP

## SPECIFICATIONS

Feit Electric's 13-watt Equivalent Direct Replacement (Type A) Non-Dimmable Linear LED Tubes replace F13T5 or T5 fluorescent and LED tubes. They work with most existing electronic ballasts for quick and easy plug-and-play installation, with no rewiring necessary. Each Linear LED light produces 1100 lumens, while using less energy than fluorescents. These warm 3000K Bright White lights create a welcoming feeling for both residential and commercial spaces. Use them in bedrooms, living rooms, restaurants, hotel lobbies, or environments you want to feel comfortable and relaxed. T521/830/LED lights turn on instantly, offering flicker-free full illumination with no warmup time compared to fluorescent tubes. They are mercury-free, with a shatter-resistant coating for safe and easy disposal. Each high-quality bulb offers accurate color-rendering, for more vibrant, true-to-life colors. Lower heat emission extends the life of the tube and ends do not turn black or burn with age. The estimated energy cost is only \$1.45 per year. Switch to Type A LED linear lights for your space and get up to 35,000 hours of superior light. That's 31.9 years based on 3 hours of daily use.

### Ideal For

General Purpose and Task Lighting

### Benefits

- Works with most electronic ballasts, no rewiring is required
- Shatter-resistant and mercury-free, no special disposal is required
- Flicker-free, instant ON illumination at full brightness
- 3000K Bright White, superior light quality with accurate color rendering (CRI: 80)
- LED technology offers more lumens per watt, saving energy over fluorescents
